No
Funding
Are you planning to set up an international research collaboration?
"International" here means either one or multiple of the following:
The research funding comes (partly) from outside of CH.
The research involves partners from outside of CH.
The research involves partners based in CH that are affiliated with a foreign state actor (e.g. a company with a foreign state as majority shareholder).
Yes / Maybe
Do you intend to share knowledge, data and/or technology with your partners?
Yes / Maybe
Please check UZH's regulations regarding data/material transfer and export control regulation and contact the Legal Services for further advice if necessary. (rechtsdienst@rud.uzh.ch)
No
Please check the self-evaluation questions for responsible internationalization to assess if any risks exist for your planned collaboration and what you need to consider.
Did you answer "yes" to one or multiple questions?
Yes
Please contact Global Affairs (responsible@global.uzh.ch)
No
Responsible Internationalization
Does your research involve human beings, human material or personal data?
No
Does your research involve animals?
No
Does your research involve pathogens, genetically modified organisms or other potentially dangerous substances?
No
Do plan to collect data or samples from outside of CH that include genetic resources (plants, animals, micro-organisms) or traditional knowledge associated with genetic resources?
No
Would you be comfortable with reading your name in the media in relation with this project?
Yes
Go ahead and all the best for your project!
Yes
Check if you need ethics' clearance and how to protect sensitive data. The ethical provisions also apply if the experiments are carried out outside of UZH!
